What do I need to do to comply with the FDA’s feed regulations?

1. **BE AWARE**
   - You may be handling feed ingredients that cannot be fed to cattle or other ruminants
   - **YOU** need to know what is prohibited

2. **LABELING**
   - Follow labeling regulations
   - If you handle prohibited materials...
     - **YOU** must label outgoing feeds containing prohibited material with the caution statement: "DO NOT FEED TO CATTLE OR OTHER RUMINANTS"

3. **MIXING AND HANDLING**
   - Prevent cross contamination
     - You must use one or more of the following:
       - **SEPARATION**
         - Using different equipment to handle prohibited and non-prohibited materials
       - **CLEANOUT**
         - Physical cleaning - sweeping, vacuuming and/or washing
         - Flushing and/or sequencing - cleaning equipment by running an adequate volume of non-prohibited feed product through the equipment. The flush product is then considered prohibited

4. **KEEP RECORDS**
   - Document what was done with products containing prohibited materials, including retail pet foods, throughout their receipt, processing, and distribution
   - Separation or cleanout records should include...
     - How the equipment was cleaned
     - Who is responsible
     - How cleanout is monitored and verified
     - How volume of flush material was determined and handled
   - Keep records for at least ONE year

---

3. **MIXING AND HANDLING**
   - Prevent cross contamination
     - You must use one or more of the following:
       - **SEPARATION**
         - Using different equipment to handle prohibited and non-prohibited materials
       - **CLEANOUT**
         - Physical cleaning - sweeping, vacuuming and/or washing
         - Flushing and/or sequencing - cleaning equipment by running an adequate volume of non-prohibited feed product through the equipment. The flush product is then considered prohibited

---

4. **KEEP RECORDS**
   - Document what was done with products containing prohibited materials, including retail pet foods, throughout their receipt, processing, and distribution
   - Separation or cleanout records should include...
     - How the equipment was cleaned
     - Who is responsible
     - How cleanout is monitored and verified
     - How volume of flush material was determined and handled
   - Keep records for at least ONE year

---

**DO NOT** contaminate ruminant feeds or ingredients with prohibited materials

If you handle prohibited and non-prohibited materials, prevent cross-contamination and commingling through **SEPARATION** or **CLEANOUT**, and proper **LABELING**

**You MUST** provide written procedures of separation or cleanout methods and documentation of cleanout if you handle prohibited and non-prohibited materials

---

**BE AWARE**

- You may be handling feed ingredients that cannot be fed to cattle or other ruminants
- **YOU** need to know what is prohibited

**LABELING**

Follow labeling regulations

- If you handle prohibited materials...
  - **YOU** must label outgoing feeds containing prohibited material with the caution statement: "DO NOT FEED TO CATTLE OR OTHER RUMINANTS"

**MIXING AND HANDLING**

Prevent cross contamination

- You must use one or more of the following:
  - **SEPARATION**
    - Using different equipment to handle prohibited and non-prohibited materials
  - **CLEANOUT**
    - Physical cleaning - sweeping, vacuuming and/or washing
    - Flushing and/or sequencing - cleaning equipment by running an adequate volume of non-prohibited feed product through the equipment. The flush product is then considered prohibited

**KEEP RECORDS**

Document what was done with products containing prohibited materials, including retail pet foods, throughout their receipt, processing, and distribution

- Separation or cleanout records should include...
  - How the equipment was cleaned
  - Who is responsible
  - How cleanout is monitored and verified
  - How volume of flush material was determined and handled
- Keep records for at least ONE year
