Notes:
- LOQ: limit of detection
- LOQ: limit of quantitation
- LOQ: limit of quantification
- Mass: amount measured expressed as % or mg/g
- Uncertainty: measure of the technical variation due to preparation and analysis of the sample
- NR: not reported

Critical Results for NDA:
Total THC = (THCA x 0.877) + THC (pass < 0.3%, fail >0.3%) Note: 0.877 is a correction for loss of CO₂ upon decarboxylation of the acid form to the neutral form (e.g., THC-A converts to THC)

Sample specific information for each analysis:
- Date of harvesting, amount of material used for analysis, and equipment used for analysis

Disclaimer:
- Sample is not suitable for human consumption.
- Results are for informational purposes only.
- Sample may contain substances that are not suitable for human consumption.
- Results are not intended for use in determining the legal status of any substance.
- Results are not intended to be used in the manufacture or sale of any substance.
- Results are not intended to be used in the manufacture or sale of any substance other than the substance specified.
- Results are not intended to be used in any manner that could be construed as an attempt to influence the legal status of any substance.
