● USDA FSA      ● USDA NRCS

**USDA Farm Service Agency (FSA)**

**Prevented Planting Reporting**

**Deadline: July 15, 2019**

The U.S Department of Agriculture Farm Service Agency (FSA) in Nebraska is extending the deadline for producers in the state to report their spring prevented plant crop acres to July 15, 2019. This new deadline coincides with the July 15, 2019, FSA acreage certification deadline.

Producers are encouraged to communicate with their county FSA office as soon as possible regarding completion of both their spring crop acreage certification and their prevented plant acres reports.

**USDA Natural Resources Conservation Service (NRCS)**

**Environmental Quality Incentives Program (EQIP)**

**Deadline: July 19, 2019**

The EQIP sign-up is for farmers in Nebraska who could not plant their crops because of flooded or wet fields. This sign-up provides technical and financial assistance to help farmers plant cover crops, an alternative to letting fields go fallow and uncovered. The deadline to apply is July 19, 2019. This is an extension of the June 21 sign up deadline announced in April.
