

THE NEBRASKA DEPARTMENT OF AGRICULTURE IS HOSTING *Meetings for new ESA-FIFRA Pesticide Labels*

Pesticide labels have begun to have new language requiring measures for reducing runoff and drift to help protect nontarget plants and animals, including threatened & endangered species. This meeting is to help educate pesticide retailers, ag co-ops, commercial applicators, CCAs, agronomists, NRCS field staff, Extension Educators and others who help farmers. Farmers are also encouraged to attend.

Topics

- Overview of the changes
- Bulletins Live! Two Map
- Mitigation menu and calculators for runoff and drift reduction
- Regional crop scenarios and using the runoff and drift calculator tools
